

PLANT AND HYDRAULICS ENGINEER

Job Description

We are looking for an experienced Plant Fitter to join our growing team in Harworth. **Ground Support Services (UK) Ltd is a specialist drilling contractor to the geotechnical and civil engineering sectors** and has gained a wealth of experience providing a complete range of services including general investigative work through to the investigation and treatment of historic mine workings. This role is suited to someone who has supervisory or management experience in this field as the current incumbent will be looking to retire within 6 to 12 months or earlier should the right person be found.

Requirements for the Plant Fitter:

- Minimum 10 years experience in a plant engineering background
- Welding experience
- Background working with diesel engines
- Experience working with hydraulic machines
- Full clean drivers licence
- CSCS Card (preferred)
- Fluent English in written and verbal communications

Benefits for the Plant Engineer:

- Paid holidays
- Competitive salary
- Continuous training and development
- Career progression
- Pension scheme available
- Car parking facilities on site
- Maintenance vehicle will be supplied
- Integral part of a great team
- Access to free training, financial and health support via Doncaster Chambers

Responsibilities for the Plant Fitter:

- Use their initiative to diagnose problems and work out a solution
- Site visits may be required
- Servicing and maintaining equipment (Soilmec, Casagrade, Beretta and other drilling equipment)
- Preparing plant ready for site.
- Monitoring plant maintenance records, warranty servicing and certification.

If you are a plant engineer with welding experience / diesel engines and hydraulic machines and looking to take on additional responsibilities, we would love to hear from you!
